Business Synopsis

I help architects save time and money on their projects by taking away the tedious but very important tasks of door hardware specification and submittal review, and providing quality design solutions in return. Every project that includes doors can make use of my services.

Ryan Shoop Consulting, LLC is a sole practitioner LLC owned and operated by me, Ryan C. Shoop, RA, independent architectural door hardware consultant. I am an architect licensed in the state of NJ with over 10 years of experience specifying architectural door hardware. I have taken the door hardware component of many projects through design to successful completion in construction.

Certification

Registered Architect (NJ) - #21AI01935600	2013 – Present
NCARB Certificate - #70508	2010 – Present

Education

Bachelor of Architecture (B-Arch) - Rensselaer Polytechnic Institute	2007

Door Hardware Specification   2009 – Present

- Review of owner's project standards for door hardware.
- Door hardware product research and cross-manufacturer product comparison.
- Direct collaboration with the project client to determine design parameters for door hardware.
- Review of architectural plans to ensure appropriate door hardware configurations are specified for each and every door.

Door Hardware Submittal Review   2013 – Present

- Review of door hardware submittals provided by the general contractor.
- Review of product substitutions proposed by the door hardware contractor.
- Notifying the project team of deficiencies in substitutions proposed by the contractor, when compared against the specifications.
- Collaboration with the contractors to resolve complex hardware coordination issues.
